**Subject:** Understanding Scratch Dig

Sirs,

We are struggling with the scratch dig standard in our inspection department.

While looking for additional guidance, we noted the following training being done in San Diego by David Aikens (<http://www.spie.org/Conferences/Programs/05/AM/shortCourses/index.cfm?fuseaction=shortcoursedetail&course=SC700>)

Is similar training offered by your company? Is it possible to meet with Mr. Aikens or someone in your company in regards to this topic?

Thanks,

Jason
